ADJUSTABLE FORTRESS

FIBREGLASS TELESCOPIC 360° PLATFORM

FAST SETUP. EASY STORAGE.

Set up in one smooth motion—just push to open, pull to fold.

FULL CIRCLE SAFETY

Adjustable Fortress™ gives you 360-degree freedom to work all around the platform. Enclosed rails, wraparound protection, and an auto-closing gate keep you secure from every angle—so you can move, reach, and get it done without compromise.

KNOW WHEN TO STEP OFF

The patented Ground Cue® gives a distinct click you can hear and feel, so you know when you've hit the bottom rung. No second-guessing. No rolled ankles. Just confidence with every step.

WORK SAFER WITH MORE STABILITY

Wide-flared outriggers triple the ladder's footprint for serious side-tip resistance, giving you a stronger, more secure setup every time you climb.

ROLL WITHOUT THE STRAIN

The Locking Wheel Lift Kit makes transport and setup effortless. Lift, lock, and roll without removing your tools or burning extra energy. Built for smooth mobility that keeps safety first.

AS/NZS 1892.1 • 150 KG LOAD RATED • CERTIFIED

Part Number	Model	Max Reach Height	Highest Standing Level Min	Highest Standing Level Max	Storage Width at Base	Weight
